

FIRE SAFETY

Tailored Fire Safety Solutions

PB Fire Safety is currently progressing through BAFE SP205 certification, supported by the proven experience of the PB Safety Group, which has held BAFE SP205 certification since 2023.

Why Do You Need Us?

If you are the Responsible Person, you have a legal duty under the Fire Safety Order to ensure your building is safe and compliant. This includes carrying out a suitable and sufficient Fire Risk Assessment, maintaining fire precautions, and implementing effective fire safety procedures.

PB Fire Safety provides competent support to help you meet these responsibilities, reduce risk, and maintain compliance with current UK fire safety legislation, including the Fire Safety (England) Regulations 2022.

How We Work:

Consultation

Schedule a free consultation with our specialists. We'll understand your needs and provide a tailored proposal for the best solution.

Assessment

The assessor meets the client on-site to review safety paperwork and inspect the areas, documenting findings. Clients are welcome to ask questions.

Compliance

The assessor submits the report for review. The Responsible Person then reviews it, addresses the actions, and follows the detailed recommendations.

Our Services:

Fire Assessments

- **Fire Risk Assessments (FRA):** Detailed evaluations to identify fire hazards and ensure safety compliance for both common areas and individual units.

Emergency Procedure Plans

- **Fire Emergency Plans (FEEP):** Comprehensive guides with steps for safe evacuation, PEEPs, and emergency response, ensuring legal compliance and safety for occupants.

Fire Training

- **Fire Safety Training:** IOSH-approved online courses covering fire awareness, fire warden duties, and fire extinguisher use to ensure workplace safety and compliance.

Fire Door Inspections

- **Fire Door Inspections:** Regular visual checks to ensure fire doors and self-closing devices function correctly, preventing fire and smoke spread in compliance with safety regulations.
